

I am writing this because I am concerned about how LPFM could effect Lincoln, Ne. Our K-Love station (91.9) has been a very important station to me and my family. It has been a great source of news and uplifting music that helps me get through the day. I have not heard any station in this area that is uplifting every hour of everyday. I am concerned that if this station is displaced many people would loose the encouragement and the enjoyment of listening to good music. This station is unlike any I have ever known. I believe this station is of public interest because they keep the listener up to date on news, plays great music, and is a station where people really care about you as the listener and not just their paycheck. Thank you for your time and reading my comments. Andrea Wood
